

# Water/air gun

## Lots of power with little water

The gun is made of cast aluminium and has a blue rubber cover on the grip and the nozzle. The trigger opens and closes both the water and air supply.

The air-water mixture delivers high impact force at relatively low water consumption. This gun is mainly used in the food industry for cleaning mesh aprons and gloves and slaughtering utensils. Also cleaning machines, surfaces and vehicles. Also consider cleaning screens, conveyor belts, grates, etc.

Available model:

**AKAWLU1-B**

All article numbers in **bold** are available from stock.

### Technical specification

<b>Material of body and trigger</b>	Aluminium
<b>Material hose tails</b>	Brass
<b>Material nozzle</b>	PA66
<b>Material of insulation</b>	EPDM rubber
<b>Connection</b>	2x 10 mm hose tails
<b>Maximum pressure</b>	5 bar
<b>Weight</b>	800 g
<b>Dimensions</b>	250x161x50 mm

Connections for air and water
